Response to Amendment

1. The amendment filed on 12/6/05 has been entered. Claim 10 is canceled and claims 7-9 are now pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fowler (US 2003/0126394 A1) in view of Watanabe (US 6,748,502 B2).

As per claims 7-9, Fowler discloses a system and method for remotely configuring storage space in multiple storage devices, said multiple storage devices allocated to a user for storing data from the user where said user is located at a site remote from the storage devices. Customer can expand or reduce its allocated data storage space and SSP customer must manually contact or consult the SSP and a staff member at the SSP's data center must manually take the steps necessary to increase or decrease the data storage space allocated to that user. This includes insuring that the customer's increased or reduced data storage space is accurately reflected for accounting and billing purposes (page 1, [0008]). Fowler further discloses a storage device manager in communication with the remote user and the plurality of storage devices, wherein the storage device manager presents a plurality of virtual storage volumes are mapped to the allocated storage devices (page 3, [0032] and page 4, [0036]). Fowler does not

explicitly disclose managing a storage device manager for service but Watanabe discloses a system for providing a data storage service comprising a service provider site configured to provide a data storage service and a user site coupled by a wide area network (WAN) to the service provider site, the user site comprising a local storage having a virtual storage (see abs.). The system allows a service provider to tune up the local storage by using statistics data and user log data that are tracked by the local storage, and the service provider then charges the user for these tuning services (col. 2, lines 35-40).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the charging for services as taught by Watanabe into the system of Fowler because it would manage data not only by storage volume but also by directory, file, cylinder and/or block address.

Response to Arguments

4. Applicant's arguments with respect to claims 7-9 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's arguments about Watanabe are moot in view of the newly added reference (Fowler) that discloses the missing elements in Watanabe.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3627

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
